Dear Janice:

Re: Water Collection In The Alley

As you know, the Town Hall parking lot was dirt-filled and gravelled during Fall of 1979 resulting in a large quantity of surface run-off water from part of that parking lot, plus the blacktopped area in front of the school to be collected on the town alley in front of the Greenville School. This will result in icy and slippery road conditions providing a safety hazard for children attending the school and increasing accident rates between buses and normal traffic in this alley.

I asked Mr. Homer Sarabi from my office, and Mr. Dan Cristiani to look into the problem and give me a cost estimate to correct the problem which totals \$1,880. It appears that the best resolution would be to install a catch basin in the low spot, where the alley and Town Board parking lot meet, and install 8" underground PVC pipe to carry the water to a drainage ditch on the south side of Clark Street on the east side of Cross Street.

Because this problem is considered to be a problem both to the School Corporation and the Town Board, it is proposed that we share the cost equally or \$940 each.

An early reply is requested to do the job before weather prevents doing the work.

Sincerely,

Robert Zoeller
Resident Engineer
