Set up spreadsheet to calculate - Gary.

Lift station @ Wind Dance - Quest did a good job designing Take Plan to State for Approval - Not sprinkler & not enough for fire protection - Higher Elevation, Or order to put a pump in big enough for fire protect - Very expensive. Just what we are doing is \$20,000. - Don't put a hydrant in Phase III cuz that makes it appear that we have fire protection & the flow is not sufficient.

Car Wash 350,000 / mo.

RE: Our File: 65-D-6996-31
Date of Loss: 1-5-98

Dear Mr. and Mrs. Gahlinger:

Be advised that we are the liability insurance carriers for the Town of Greenville, in reference to your claim of 1/5/98 concerning water damage to your personal property.

We have conducted an investigation into this matter and do not feel that the Town of Greenville has any liability in regards to your damages. Your contention that the damage was caused as a result of the failure to have a shut-off valve on the meter, does not constitute a negligent act, on the part of the Town of Greenville.

It is a fact that the shut-off valve was missing, but this shut-off valve is for the sole convenience of the water company and access to a meter pit by anyone, other than an employee of the water company, is prohibited. If a shut-off is desired by the customer for the sole customer's use, it must be installed by the customer and on the customer's portion of the line. The proximate cause of your damage was the break in the line from the meter pit to your home. The employees of Greenville Water responded to your emergency in a timely fashion, under the circumstances, since it was after regular working hours.

We must respectfully deny any payment for your damages on behalf of the Town of Greenville in this matter.

Very truly yours,
